

**Homework** is set every week to practice key skills taught in class in KS1 and mental maths skills across KS2. The children are also encouraged to play TT Rockstars and Numbots (found at the same web address) at home.

We use **Times Tables Rockstars** across the school to support children with their rapid recall of their times tables. Children are given a username and password to access the website (<https://ttrockstars.com>) and are set specific tables to work on. Please be aware that this is a place to practice not necessarily learn the tables – this is done in class.

**Numbots** can also be found at the TT Rockstars website. We particularly encourage the children in KS1 to use this site to practice their rapid mental skills with addition and subtraction.
