Now make a final league table.

Who has won the league?

INSTRUCTIONS

Use a dice to roll a score for each team. Roll the dice twice each time – if you roll the same number twice then that team scores 0, otherwise write down the first number rolled for that team.

EG. Wolverhampton Wanderers **2** **0** AFC Bournemouth

First number rolled on the dice is a 2. Second number rolled on the dice is 3. So Wolves score 2.

Third number rolled on the dice is a 4. Fourth number rolled on the dice is a 4. So Bournemouth score 0.

Write in the scores for each team. Wolves beat Bournemouth 2-0.

After completing each page of scores (so two whole boxes of fixtures) you will need to fill out a new League Table that includes the games you have completed (remember that teams get 3 points for a win, 1 point for a draw and 0 points for a loss).

The current league table is shown for you to use as an example. At the end of all the games you will need to order the League Table to show which position the teams finished in.

GP = games played

W = games won

D = games drawn

L = games lost

F = goals scored

A = goals against

GD = goal difference (F – A)

Pts = Points earned
